Who We Are

Avenza International is a project-focused lighting company delivering architectural, decorative, and customized lighting solutions for residential, commercial, and mixed-use developments.

We work as a lighting partner — not just a supplier — supporting developers, consultants, and contractors with reliable products, controlled manufacturing, and disciplined project execution. Our approach combines design understanding, technical coordination, and structured delivery to ensure lighting solutions meet both aesthetic and performance requirements

About Us

[Home](#)

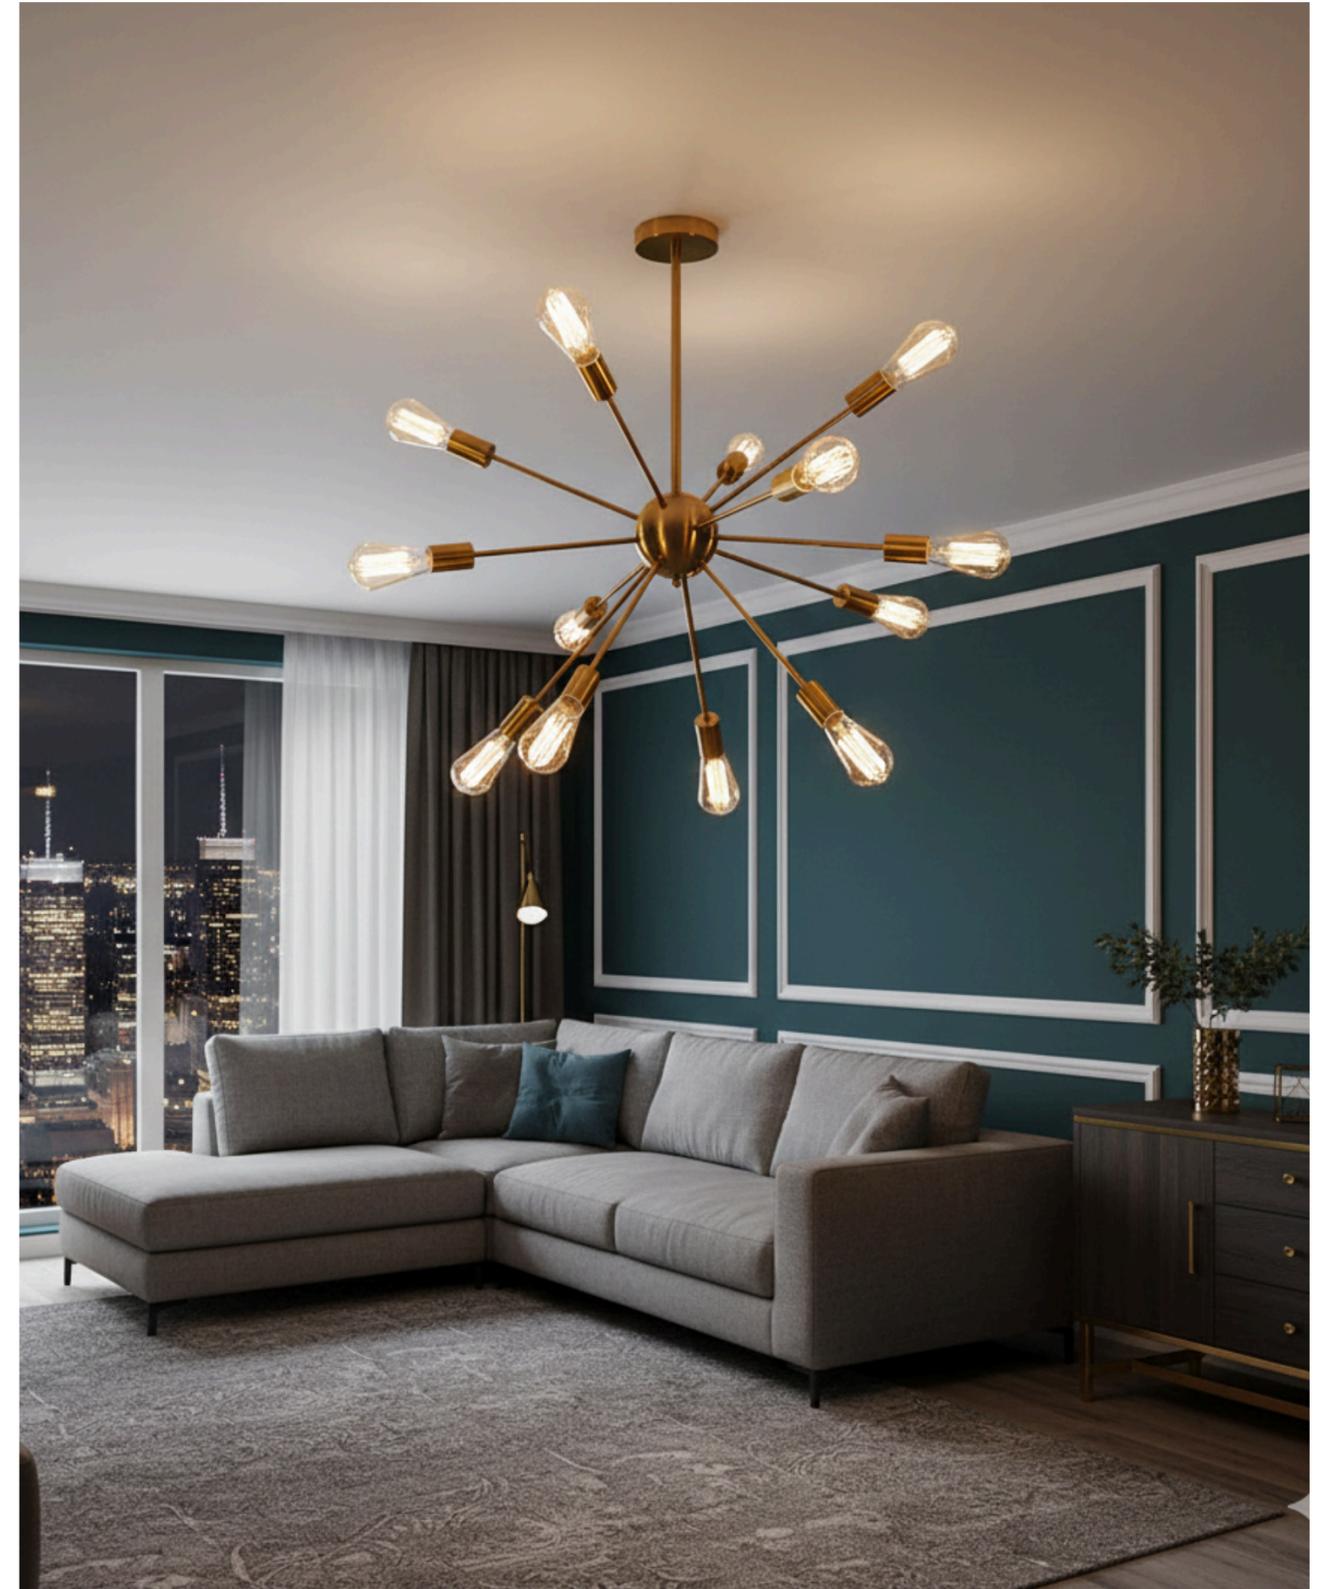

[About Us](#)

[Services](#)

[Contact](#)

To become a trusted lighting partner for premium architectural and real estate projects across the region, known for reliability, customization, and long-term project support.

Our Vision

Our Mission

Let us achieve our great mission together.

Mission 1

To support architectural and real estate projects with reliable lighting solutions through design coordination, controlled manufacturing, and on-time delivery

Mission 2

To deliver well-engineered lighting solutions by working closely with developers and consultants, ensuring quality, consistency, and smooth project execution

Mission 3

To provide customized, specification-grade lighting solutions that enhance built environments while maintaining high standards of quality, efficiency, and service.

Our Journey

Dream big, work hard, and create
magic with **Avenza international**

Our Project Capabilities

Concept & Design Support

We coordinate with architects and lighting consultants to support layouts, technical input, and lighting intent alignment during project planning stages.

Customization & Manufacturing

Our capability includes custom luminaires, finishes, sizes, and outputs manufactured through vetted OEM partners to meet project specifications.

Quality Control & Testing

Each product undergoes inspection, functional testing, and quality checks prior to dispatch to ensure compliance and reliability on site.

Lead Time & Logistics

We manage production planning, shipment coordination, and delivery scheduling aligned with construction milestones.

Project Coordination

Dedicated project coordination ensures clear communication, progress tracking, and timely execution from order confirmation to handover.

Product Categories

- Architectural indoor lighting
 - Decorative & feature lighting
 - Outdoor, façade & landscape lighting
- Linear & system lighting
- Smart & control-ready lighting
- Custom project luminaires

Industries We Serve

- Real estate developers
 - Architects & lighting consultants
- Main contractors & MEP contractors
- Hospitality & mixed-use developments
- Residential & commercial projects

Customization & OEM Manufacturing Capability

From concept to production – built around your project.

PURPOSE (WHY THIS PAGE WINS DEALS)

▶ **Developers read this page to answer:**

- Can they customize for my project?
- Do they control manufacturing or just trade?
- Can they manage quality, cost & timelines?

Each product is developed to align with architectural intent and technical requirements.

OEM Manufacturing Network – China

We work with approved OEM manufacturing partners in China, selected for their experience in architectural and project lighting.

Cost-efficient production

Flexible customization

Scalable quantities for large projects

Consistent quality across batches

Customization Built for Projects

Fixture dimensions & profiles

Finishes, colors & materials

Light output, CCT & beam angles

Mounting methods & installation details

Driver specifications & control compatibility

From Concept to Production

- Approved samples before production
- Batch** consistency checks
- Doc shipment inspection

Our OEM model is designed to **'reduce' risk, not create it.**

Lead Time & Logistics Management

Structured timelines. Reliable delivery. Zero surprises.

Our Delivery Approach

At Avenza International, we understand that project timelines are critical. Our lead time and logistics process is designed to ensure smooth coordination, predictable delivery schedules, and complete transparency at every stage of the project.

Logistics & Supply Chain Control

- OEM manufacturing partners in China
- Pre-shipment quality inspection
- Secure international shipping partners
- Air & sea freight options available

On-Time Delivery Commitment

- Project-based scheduling
- Batch and phased deliveries supported
- Regular progress updates
- Single point of coordination

Standard Lead Time Framework

● Design Finalization & Approval	5-7 working days	5-7 working
● Sampling & Prototyping (if required)	10-15 days	10-15 days
● Production & Assembly	20-35 days	
● Quality Control & Testing	3 - 5 days	
● Shipping & Customs Clearance	10-20 days	■ As per project schedule

Timelines are optimized through **early** coordination and phased deliveries when required.

Logistics & Supply Chain Control

- OEM manufacturing partners in China
- Pre-shipment quality inspection
- Secure international shipping partners
- Air & sea freight options available

WHY CHOOSE AVENZA^{INTERNATIONAL}

Project-driven approach, not trading

- Customization without complexity
- Controlled sourcing & manufacturing
- Clear communication and accountability
- Focus on timelines and execution
- Long-term partnership mindset
